⑤ Microphone

⑥ Magnetic charging/data transfer

Start the recorder

Power on: press the power switch for three seconds, the screen will display "welcome" after three seconds, and the voice recorder will power on

How to record

Recording: After power on, the screen displays the recording mode and battery level, short press the recording switch for one second, enter the recording, and the vibration vibrates once. Or start recording on the APP.

Switch mode: switch the mode switch to the right, enter the conference mode recording, and capture the sound by the dual-array microphone. Switch to the left, enter the call recording mode, and capture the sound by the bone conduction sensor.

How to save

Power off: When the power is on, press and hold the power switch for three seconds, the screen will display "see you" after three seconds, and the recorder will power off.

Audio files can be viewed or played on a computer, or connected to AI smart applications for transcription, summary, sharing, etc.

Connect computer

Technical specifications

Appearance size	87*53*3.1mm
CPU	ATS3085
Bluetooth	5.3
Mobile phone system	Android 5.0 or above / iOS 9.0 or above
Charging	Magnetic charging pin
Memory capacity	64GB
Charging duration	About 1.5 hours
Recording duration	About 40 hours
recording format	MP3
Bit rate	32kbps
Operating temperature	-5℃ - 40℃
Supported operating systems	windows linux IOS

How to bind

1.Turn on the device and click the App link icon to search for the device model and Bluetooth name.

2.Click the App connection icon to search

3.For example, device model LA518

4.Link Success

How to Sync Files

1.After the connection, if there is an audio file on the device, it will automatically be displayed on the app interface

1.Please sync the audio file to the app first

2. Synchronization completed. Click the play button to play the current file

How to transcribe

1.Click Generate and select the required language and summary template

Recording language

Generate

Start transcribing

How to start recordings

1. Click the recording icon and select start recording to enter recording mode

Start recording

Import audio

2.Click the button to start recording. Click once during recording to pause, click again to resume recording

00:00:00.00

00:00:16.20

How to delete recording files

1.Select the file you want to delete. Long press and slide to the left

2.Press the file and slide it to the left to edit the file name

How to recover deleted files

1.Click File and click the upper right menu button

2. Click on Recycle Bin

How to share

1.Summary document sharing

2.Select the type you want to export

3.File transfer via Bluetooth, and share files through social software, email and so on

How to rewrite

1.Please re-transcribe if you want to change to another language

2.Click the 'more' icon in the upright corner

3.Click to confirm the transcription. Select the desired language Summary

How to unbind a device

1.On the main interface, click the connection icon to enter the recording settings.

2.Unbind: Unbind the device from the app

Increase duration

1.Disconnect: Bluetooth between the device and the app is disconnected

2.Unbind: Unbind the device from the app

1.Activate the recording settings, and get 400 hours of free transcription time each month for 5 consecutive months, totaling 2000 minutes of recording time. If you run out of time, you can click on the remaining time to enter the member center and purchase the time you need.

Click to enter the member center

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment

generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -- Reorient or relocate the receiving antenna. -- Increase the separation between the equipment and receiver. -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.
